

## Excellent! Intenso Quick Charge Powerbank Q10000 wins Red Dot for high quality design

The jury has reached its decision: After several days of assessing thousands of products from all over the world, the Intenso Quick Charge Powerbank Q10000 received the distinction “Red Dot”. With the Q10000, Intenso has created an outstanding design that the expert committee for the Red Dot Award: Product Design 2017 has recognised with the internationally sought-after seal of quality.

Astonishing charging speed, high capacity and compact design: The Intenso Quick Charge Powerbank Q10000 provides optimum effectiveness for mobile charging processes. With the Quick Charge 3.0 function, the Q10000 charges compatible devices up to 4x faster than conventional chargers.\*

Quick Charge works with an intelligent communication algorithm between the devices. There is permanent communication of what power level is required at that specific time. Through this intelligent complete control, the mobile charging process has not only maximum efficiency, but it also ensures that the device being charged is handled carefully. Thanks to the installed lithium polymer batteries with a capacity of 10,000 mAh, the Powerbank Q10000 prevails with its astonishingly fast charging processes as well as its thin design.

The significance of the international design competition, Red Dot Award: Product Design, with its headquarters in Essen, Germany is well established internationally. It was already more than 60 years ago that a jury convened for the first time to assess the best designs of the day. Since then, an expert team has been awarding the seal of quality for good design and innovation to the outstanding designs of the year.
